

# Dear Github users

In this simple showcase you see most of the cool features that you can do with cat-boot-report.pdf. This framework is not a full-fledged reporting engine, but it should help you in printing simple reports for your Java apps without digging into complicated reporting engines.

## Table

You can not only add text, but also tables:

COL1	Image	COL3
x1		x3
y1	y3	<div>12</div> <div>z1z2</div>

## Formatting

*You can also format text as you can see here.*
