

# Dear Github users

In this simple showcase you see most of the cool features that you can do with cat-boot-report.pdf. This framework is not a full-fledged reporting engine, but it should help you in printing simple reports for your Java apps without digging into complicated reporting engines.

## Table

You can not only add text, but also tables:

COL1	COL2	COL3
x1	x2	x3
y1	y2	y3

## Formatting

*You can also format text as you can see here.*

## Images

Images are also supported out-of-the-box:
