# Dear Github users

In this simple showcase you see most of the cool features that you can do with cat-boot-report.pdf. This framework is not a full-fledged reporting engine, but it should help you in printing simple reports for your Java apps without digging into complicated reporting engines.

Table

You can not only add text, but also tables:

COL1	Image	COL3	
x1		x3	
y1	y3	**1** z1	**2** z2

Formatting

You can also format text as you can see here.
